<p>APPLICATION NUMBERS 2011-09015-PB00084; 2012-09017-EP00093 Detailed Planning and Environmental Permit Applications for the Construction of a Commercial Building (to include a supermarket and nine shops) at Orange Bay Square, Hanover by Just One Services</p>	<p>Environmental Permit and Planning permission granted with stipulated conditions</p>
---	--

<p>APPLICATION NUMBER 2011-14017-EP00235, 2011-14016-BA00683 Environmental Permit and Planning Application for housing project (Two hundred and forty (240) studio units on 20,709.275m² of land) at Greater Portmore, St. Catherine by West Indies Home Contractors (WIHCON)</p>	<p>Environmental Permit and Planning permission granted with stipulated conditions</p>
<p>APPLICATION NUMBER 2012-10017-EP00081 Environmental Permit for sand mining at Paradise, Paradise Pen, Westmoreland by Paradise Park Limited</p>	<p>Environmental Permit refused for the following reasons:</p> <p>The area that is proposed for the sand mining falls outside of the applicant's registered property boundary. As such, the applicant would need to apply to the Commissioner of Lands for a lease to facilitate carry out the proposed sand mining activities.</p> <p>An assessment of images from Google Earth for the period 2001 to 2009 and areal photographs taken by the Agency in 1991, suggests that the large beach now present at the location was likely as a result of a single meteorological event (likely a hurricane or tropical storm offshore Jamaica) which generated long period swells. As such, it is clear to assume that if another similar event does not occur, the pit created by the sand mining activities will not be filled in the short course. The occurrence of this meteorological event is the sole parameter used in the model to predict the time for the infilling of the excavation pit and based on the above, this prediction is likely to be overly optimistic. It is possible that another similar event may not occur for another 15 years, as was the case between 1991 and 2007.</p> <p>The sand mining at this location could lead to the complete destruction and loss of this natural beach, as the natural, day to day processes occurring at this beach would not allow for the infilling of the excavation pit.</p> <p>The proposed activity will negatively impact documented sea turtle nesting activities along this section of coastline as the pit, if not filled, will prevent</p>

	<p>adult sea turtles from accessing the lightly grassed areas behind the beach. Further, if the adult sea turtles are able to navigate the terrain created by the excavation, the hatchlings will not be able to find their way to the water and will become trapped in the excavation pit.</p>
<p>APPLICATION NUMBER 2012-04017-BL00032 Beach Licence for construction and maintenance of 2 seawalls, construction and maintenance of 1 groyne, capital dredging (453 m³), coastline reclamation (592 m³) and special beach licence for the removal of an existing groyne at Trident Hotel, Anchovy, Portland by TLC International (Jamaica) Limited</p>	<p>Beach Licence granted with stipulated Conditions</p>
<p>APPLICATION NUMBER 2008-13017-EP00253 Request for Special Permission from New Yarmouth Distillery for temporary use of Overhead Irrigation by New Yarmouth Estate</p>	<p>The application was refused for the following reasons:</p> <p>The Agency does not accept the reasoning that the Ferti-irrigation of the 80ha of land by Overhead Pivot Sprinklers will assist in preventing over topping of the micro dam during heavy rainfall. If the appropriate application rate is maintained during dry periods no run off of dunder should reach the micro dam. Also if no Ferti-irrigation is done during rain fall <u>as required by the permit</u> then no run off of dunder should reach the micro dam.</p> <p>No form of irrigation is permitted during rain fall events as stated in the permit and if the dam is to over top at any time it would be in a rainfall event, hence the irrigation mitigation strategy would not be applicable.</p> <p>The permit requires the entire cane fields to be irrigated by subsurface irrigation distribution system when dunder is used, which was deemed to be the most appropriate method at the time of the application when all environmental factors were considered. Allowing the use of this method without the appropriate studies such as application rate and drainage patterns may leave the environment at risk.</p>

<p>APPLICATION NUMBER 2008-06017-AQ00001 Air Pollutant Discharge Licence at Port Rhodes, Discovery Bay St. Ann by Noranda Jamaica Bauxite Partners</p>	Amendment granted with stipulated conditions
<p>APPLICATION NUMBERS 2010-13017-EP00058; 2010-13017-EL00018 Environmental Permit for construction and operation of a sewage treatment facility and discharge of sewage effluent at Milk River Hotel and Spa, Milk River, Clarendon by Tourism Product Development Company Ltd</p>	Amendment granted with stipulated conditions
