

We have to be careful what we do

Be careful how we stare

Before we point our fingers

Or put the blame on what we share

Lets all come together

It's our planet: consume with care

The water that surrounds us

The flowers and the trees

Provides for us a happy home

An air so we can breath

So together, let's work on it

Let us make it clear

That It's our planet: let's consume with care

A healthy life and lifestyle

That is what we need

We need to work, give it our best

So we can all succeed

Pollution no solution

No toxins in the air

Let's stop our world from dying

It's our planet: consume with care

As children we can see

That all is not yet lost

So let's do this together

Make today a better past

Stop fighting for nonsense

Let's fight for a cause

Fighting for our environment

Isn't breaking any laws

So lets all join hands together

To form an environment team

Clearing up the atmosphere

Making our surroundings clean

Ready

Set

Go

Together everyone should cheer

It is our planet: so let's consume with care.
