27th December 2001

DREDGING AND RECLAMATION PROGRAMME IN KINGSTON HARBOUR

The R1 bund preparation continues:.

Monitoring trips were carried out on the following dates:

Tuesday 11th December: Observing the initial dredging operations connected with the preparation of the R! Bund.

Wednesday 12th: Dredging begins

Thursday 13th December: Monitoring of activities by sea. Water samples collected and field measurements made: Photographs taken. Analytical results of samples taken not yet available.

December 24th: Aerial flight for dredge barge inspection carried out Pictures taken

Comments:

Minimal plume seen to south of dredge - approx 30m long

Larger area of discoloured water seen around end of pipe at dump site / bund inside Hunts Bay

No screens visible - these were supposed to be an important part of the license granted by NEPA
